Dear Friends,

The Home of Otome ' Internet Gift No.04: Otome No Himitsu (Full Uncut and Scanslation)

When I finished HTML editing for Otome No Himitsu game, I had to come here to announce it, so that everybody know the full story of what happened.
When I started this project, I didn't plan it that I would have to have this much efforts. So, after about 6 months...vacation..., I have finished all my work.
And here is my HT, you can play it.
It's probably a little slower than the previous clone I did.
I won't show the gameplay now, for it's very boring.
What's interesting is the fact that it's not just a simple clone (of D3:Kingu Kouryaku Z2

All credit goes to the guys from Head Over Heels for creating such a great game:ACCT-1(-/H) is an oncogene that is overexpressed in human lung cancer and can transform immortalized human mammary epithelial cells. The Aco-thymus virus integration site 1 (ACCT-1) gene has been identified as a direct target of transcription factor Ets-1 and has been implicated in several types of cancers. To clarify the role of the ACCT-1 gene in cancer progression and to identify its possible role in lung cancer, we have conducted two independent series of studies. First, we examined ACCT-1 gene expression in primary tumors and cell lines. ACCT-1 was overexpressed in 21 (25%) of 85 non-small cell lung cancer (NSCLC) cell lines as compared with 20 (10%) of 202 normal lung tissues. It was also overexpressed in 18 (69%) of 26 early NSCLC and in 2 (15%) of 13 late stage NSCLC. Second, we ectopically expressed ACCT-1 in the human mammary epithelial cell line, 184B5. Ectopic expression of ACCT-1 in 184B5 cells transformed them to grow in soft agar and promoted the generation of large cellular nodules in nude mice. Cells transfected with ACCT-1 showed a morphological change from flattened to spindle shaped. These data indicate that the ACCT-1 gene has the potential to be an oncogene and may play a role in the progression of NSCLC. Chemical composition, antioxidant activity and antimicrobial activity of essential oils of the leaves of Ocimum basilicum L. and O. sanctum L. This study aimed to evaluate the chemical composition, antioxidant activity and antimicrobial activity
